User Guide

Assembly Instructions

Please Note: This assembly requires **3 persons**. Ensure the tower is assembled in a large area.

Step One:

Familiarise yourself with the parts.

Part Measurements:

Platform Panels	51cm x 210cm
Uprights	225cm
Long Horizontals	222cm
Short Horizontals	210cm
Long Diagonals	260cm
Short Diagonals	250cm
Wheels	25cm Diameter
Ladder	200cm x 68cm

Step Two:

Push down the brake on each wheel. Add a wheel to the bottom of each upright. Ensure your upright is the correct way up – the bottom of the upright will have a slight extension to the pole, allowing the wheel to slot in.

Step Three:

Have two persons holding a upright each, while the third person attaches the two uprights using a long horizontal beam. Slot the connector brackets into the connectors on the uprights using the peg. This will create a U-shape.

Step Four:

Attach the 2 short horizontal beams, 1 on each upright. Ensure the beams are connected at a 90degree angle to the long horizontal beam.

Step Five:

Attach the remaining uprights to the short horizontal beams. Complete the base with the final long horizontal beam.

Assembly Instructions

Step Six:

Half way up the uprights there are further connectors. Add 2 long horizontal beams and 2 short beams. This will create the base for the platform.

Step Seven:

On the **OUTSIDE** of the long horizontals, attach a long diagonal beam. This will start at the bottom left hand side, attaching to the platform level connectors on the right hand side. Repeat this process on the opposite side with the other long diagonal beam.

Step Eight:

Repeat this same process with the short diagonal beams, starting the bottom at the right hand side and elevating to the left hand side. This time however, attach them to the **INSIDE**.

Step Nine:

Attach a platform panel to the long horizontal beams, using the hooks. Push this to a far end. Continue this process with the other 3 platform panels.

Step Ten:

One person will need to climb onto the platform. Once up, attach the last to long horizontal beams. And come back down in a safe manner.

Step Eleven:

The tower is now ready to use, simply release the wheel brakes to move to the desired destination before putting the brakes back on. When stationary, simply use the hooks to attach the ladder to climb onto the platform.

Troubleshooting

Resolution Guide

Please read through the guide below if you have any issues or faults with your device. The information covers and resolves the majority of frequently asked questions.

Q: There are parts missing from my order.

A: If there appears to be any part missing from your package contact our Customer Support team via the details on the Contact page within 7 days of receipt.

Q: What kind of tools should I use to assemble the platform tower?

A: No tools are required to assemble the platform tower.

Q: Where do I attach the diagonal beams?

A: On the long side, the diagonal beams go on the **OUTSIDE** of the platform tower. On the short side, the diagonal beams go on the **INSIDE** of the platform tower. The uprights and horizontal beams will create the inner structure.

Q: What way do I load and remove my platforms.

A: The short side will be the loading/unloading ends. The long sides create a safety rail.

Q: My platform tower isn't square, is this correct?

A: The platform tower has dimensions of 250cm H x 215cm W x 225cm D, therefore will not have a square structural base.

Safety Advice

Safe Working Practice

Do not use corrosive cleaning equipment when cleaning your platform tower.

Do not exceed the shelving capacities, detailed on the Specification page. Please Note: These capacities are based on the weight distributed across the whole shelf.

Always keep the weight evenly distributed to avoid damage to the rack and to prevent the rack from falling over.

Wear gloves when assembling this shelving to protect your hands.

Ensure that each beam is properly attached into place before continuing with the assembly process.

Be sure that each platform panel is slotted into the shelf correctly before you begin use.

Always take care when loading and unloading the tower.

Always take care when climbing on and off the platform tower.

To be used in an appropriate area with suitably dressed and able adults.
