- 5) On/Off Switch
- 6) Water Feeder Pole Attachment Nozzle

Specification

Attachments

Brush Adapter

Soft Brush with Soap Dispenser

Spray

Towel

7m Water Pipe

User Guide

Operation Instructions

Step One:

Before first use on battery power, please ensure the battery is fully charged. To do this, attach the cable into charging inlet. Leave to charge for approximately 3-4 hours. The indicator light will turn from red to green when it is fully charged.

Step Two:

Once charged, unscrew the cap from the water tank. Fill with water. Replace the cap. Ensure the cap is securely fastened.

Step Three:

If you wish to power via mains electricity or car battery, first fill the water tank. Attach the cable into the mains inlet on the tank, and plug into the mains.

Step Four:

Attach the desired cleaning accessory via the attachment nozzle. Push and twist to secure.

Step Five:

Switch the water tank on via the 'On/Off' switch. Water should start flowing out of the water pole attachment. You are ready to begin cleaning.

Step Six:

Turn the switch to 'Off' as soon as water stops flowing.

Note: It is important not to run the pump dry as this can cause damage.

Step Seven:

Remove all cables and keep power off if you need to refill the tank. After refilling with water, repeat the operation process.

Step Eight:

Once finished: turn switch to 'Off', remove cables (if applicable), remove feeder pole tube, discard of any excess water and store in an appropriate area.

Troubleshooting

Resolution Guide

Please read through the guide below if you have any issues or faults with your MaxBlast Water Trolley.

Q: There are parts missing from my order.

A: If there appears to be any part missing from your package contact our Customer Support team via the details on the Contact Us page within 7 days of receipt.

Q: My MaxBlast Water Trolley will not start or suddenly stops working.

A: Check the plug socket is in and switched on at the mains. Ensure the battery is fully charged. Make sure there is plenty of water in the tank.

Q: The liquid won't spray out the attachment and/or the pressure is unstable.

A: Make sure there is plenty of water in the tank and it is fully charged/attached to a power supply. Check there is no blockages in the tubes or water tank. Clean the tubes/tank. If it is still not working correctly, the water suction tube is damaged and needs to be replaced.

Q: The joint is leaking.

A: Please check the caps and attachments are securely fastened. The rubber seal may need replacing.

Safety Advice

Safe Working Practice

Please read through the safe working practice to ensure prevention of injury or damage to the device.

Do not overwork or over charge the machine.

Turn the power off and before storing.

Only use genuine spare parts to maintain a safe and usable MaxBlast Water Trolley.

If damaged, do not operate the trolley.

The MaxBlast Water Trolley should be operated by a competent adult. Keep out of reach of children and do not allow children to operate.

Take care when transporting.

Do not pour water on the electrical housing or cables.

Keep the MaxBlast Water Trolley and accessories clean to prolong working life.

Do not operate the trolley in areas of high temperature, humidity or wet conditions as the machine may not function correctly.

Do not operate if you are drowsy or under the influence of drugs or alcohol – slow responses can cause injuries to the user.

Do not spray animals or individuals.

Do not leave unattended.

Only fill with clean water. Do not add chemicals.

Turn the power off when the tank is empty.

Wear appropriate clothing non-slip shoes and protective glasses during use to avoid accidents.

Do not run the pump when the tank is empty.
