

# T- MECH Electric Poultry Netting - 50m

213924

INSTRUCTION MANUAL

[www.monstershop.co.uk](http://www.monstershop.co.uk)

# SPECIFICATION

## PRODUCT DESCRIPTION

Introducing the T-MECH Premium Poultry Netting: a robust 50m net supported by 14 double-spiked fibreglass posts, standing 150cm tall for superior security. Crafted from durable polyethylene with stainless steel wire, it's perfect for containing poultry, hens, geese, and turkeys. Easy to electrify with an energiser, it forms an effective barrier to deter animals. Ideal for various setups, this net ensures your poultry remains safely contained.

## PRODUCT SPECIFICS

<b>DIMENSIONS:</b>	50 x 1.2m
<b>WEIGHT:</b>	7.7kg
<b>MATERIAL (Double Ground Spikes):</b>	Glass Fibre Tube with PVC Coating
<b>MATERIAL (Netting):</b>	Polyethylene with Stainless Steel Wire

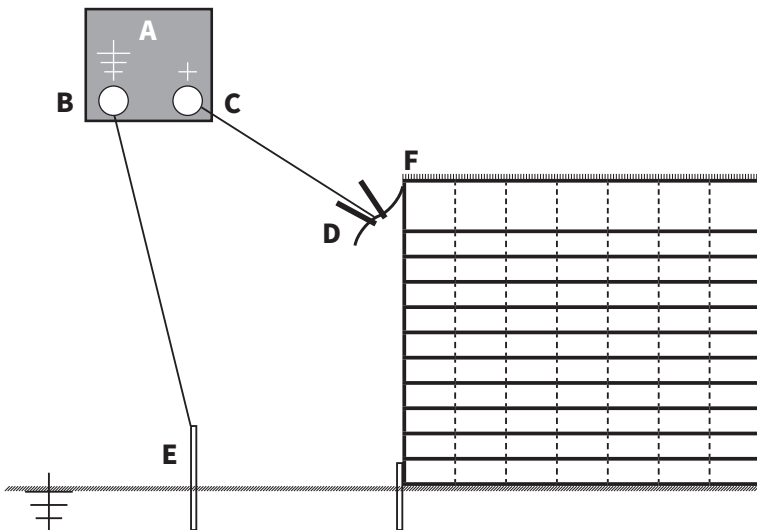

## ITEM CONTENTS

- 14x Double Spike Posts
- 1x 50m Netting
- 1x Insulator and Cable Repair Kit
- 10x Ground Spikes

# SPECIFICATION

## PRODUCT FEATURES

- A. Energiser
- B. Ground Terminal
- C. Power Terminal
- D. Jumper Clips
- E. Ground Rod
- F. Positive (Hot) Line on Fence

Monster Group UK Limited's liability will be limited to the commercial value of the product only.

# SAFETY ADVICE

## SAFE WORKING PRACTICE

Please read through the Safe Working Practice to ensure prevention of injury or damage to the device.

- Do not use the electric poultry netting for anything other than its intended purpose.
- Do not modify the electric poultry netting in any way.
- If you have more than one fence, unless they are supplied from the same circuit of energiser, the fences should be separated by a distance of at least 2 metres.
- Never supply the fence by two or more energisers. Only ever use one per fence.
- Always inspect the electric poultry netting before each use. Ensure that all parts are secure and in good working condition.
- Ensure the electric poultry netting is correctly assembled before use.
- We recommend you wear PPE when using the electric poultry netting.
- Never place your head or neck near to the electrified fence. This accidental contact can often occur when testing voltage or when placing stakes into the ground. Take extra precaution to avoid this.
- Always inspect the work area and remove any objects that could cause an obstruction.
- Do not wear loose clothing or jewellery that could get caught in the electric poultry netting.
- Apply even pressure to ensure the spikes penetrate the ground evenly.
- Warning signs should be prominently displayed on all fences at spacings not exceeding 10 metres. These signs must face outwards from the fence. They should include the symbol here;

- Where access may be gained from inside, warning signs should also be placed on both sides of the fence.

# SAFETY ADVICE

## SAFE WORKING PRACTICE

- If the electric fence is to be installed on, alongside, or adjacent to a public road or pathway, it must be properly and prominently identified at frequent intervals by warning signs attached to the fence posts.
- The size of all warning signs must be at least 200mm x 100mm and should be coloured yellow with black writing.

# USER GUIDE

## ASSEMBLY INSTRUCTIONS

1. Choose site, ensuring there are no overhead powerlines or underground utilities.
2. Unroll the netting to your desired perimeter.
3. Insert the post into the ground using a hammer or mallet, ensuring the post is firmly into the ground. Make sure the posts are evenly spread so the netting is taut.
4. Connect the energiser via the small crocodile clip.
5. Secure the ends of the netting using ties or clips to the starting post or another sturdy structure to complete enclosure.
6. Turn on the energiser and use a fence tester to check the voltage at various points along the fence.

# USER GUIDE

## MAINTENANCE

Regularly check for vegetation or objects touching the fence that may be causing shorting.

Inspect for damaged or frayed wires thoroughly after each use and before storing the item in a dry place away from flammable materials.
