FLOW RATE NOZZLE 

500ML e

T-MECH

CLEAR

Directions for use:

Ensure that surfaces are clean, dry and free from dust, oil, loose paint wax or grease etc. Spray about 10-20cm (4" - 8") away at a 90 degree angle to the surface, applying a uniform even coat of adhesive to obtain 80% to 100% coverage of the surface. If necessary, spray another coat of adhesive in areas that appear to need more adhesive. Spray both surfaces to be bonded, one surface vertically and the other surface horizontally. Allow 2-3 minutes for the adhesive to tack off so no adhesive transfers when touched by any object. Adhere surfaces and press together with adequate pressure. A roller is recommended to apply a uniform pressure in order to achieve maximum strength.

Not suitable for use on unbacked PVC (vinyl) or expanded polystyrene.

HEALTH & SAFETY DANGER

UN1950

Contains Dichloromethane EC number 200 838 9

Extremely flammable aerosol. Pressurised container: may burst if heated. Causes skin irritation. Causes serious eye irritation. Suspected of causing cancer. May cause drowsiness or dizziness. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not spray on an open flame or other ignition source. Do not pierce or burn, even after use.
