LM60 Shop Counter

204100, 204101, 214589

Unit Overview

This corner till unit is a versatile and stylish solution for maximising display and storage space in your retail environment. It can be effortlessly combined with any of the range of shop counters to form a larger 'L'-shaped configuration, or it can stand proudly on its own as an attractive and functional feature. With four display surfaces—three open shelves and the top section—you'll have plenty of space to showcase products to maximum effect.
The unit's sleek, curved frontage and wood-effect laminate finish lend it a modern yet professional look that enhances the overall aesthetic of your shop. Whether you're using it to display products or placing it near your point of sale for easy access to essentials like plastic bags, till rolls, or even a well-stocked coffee supply, this corner unit combines style and practicality perfectly. Available in black, white, and maple, it's designed to complement any retail setup.

Dimensions

LM60 Dimensions:

- **Product Height:** 0.9m
- **Product Depth:** 0.6m
- **Product Width:** 0.6m
- **Internal Shelf Heights:** 24.5cm

Safety Advice

- Make sure the unit is positioned on a flat, stable surface to prevent wobbling or tipping.
- If placing the unit on uneven flooring, use appropriate levelling methods to secure the unit.
- Do not exceed the specified weight limits for the shelves and surfaces to avoid damage to the unit or risk of injury.
- Ensure products are evenly distributed across shelves to prevent tipping or overloading.
- Ensure that children do not climb or play on the unit to prevent accidents or injury.
- Regularly inspect for any wear, such as loose screws or weak joints, and tighten or repair as necessary.
- Be cautious when handling items on glass shelves. Do not overload the shelves beyond their stated capacity, as this could lead to cracking or shattering.
- There may be debris and/or sawdust in the pre-drilled holes. Remove this before commencing with assembly. Use gloves to remove it.

C1500 LED Shop Counter

214654/214655/214656

Unit Overview

The C retail counter is a versatile unit that offers both extensive display options and secure storage. The top section includes two glass-fronted shelves, complete with LED lighting to create an attractive, illuminated display for products. Beneath the display area, hidden storage provides ample space for supplies or stock, secured by lockable doors for added protection. With its durable laminate finish, this counter ensures long-lasting durability and easy maintenance. Available in black, white, and maple, it's the perfect solution for retailers looking to balance elegant product presentation with functional storage.

Dimensions

C1500 Dimensions:

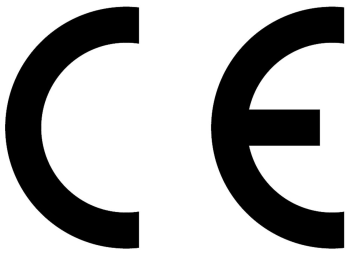
- **Middle Shelf Max Storage Height:** 21.8cm
- **Bottom Shelf Max Storage Height:** 30.5cm
- **Product Net Weight:** 97.8kg
- **Keys Included:** 2
- **3 Colours:** Black, Maple, White

Specifications

C1500 Specifications:

- **Power (W):** 8.6W
- **Power Supply (Input Voltage):** 100~240V
- **Voltage:** 12V
- **Brightness (Lumen):** 345.4LM
- **Colour Temperature (K):** 6432K
- **Lifespan (Hours):** 30000H
- **Operating Temperature Range:** '-20 ~ 50

Safety Advice



- Please read through the Safe Working Practice to ensure prevention of injury or damage to the device.
- Make sure the unit is positioned on a flat, stable surface to prevent wobbling or tipping.

- If placing the unit on uneven flooring, use appropriate levelling methods to secure the unit.
- Do not exceed the specified weight limits for the shelves and surfaces to avoid damage to the unit or risk of injury.
- Ensure products are evenly distributed across shelves to prevent tipping or overloading.

- Ensure that children do not climb or play on the unit to prevent accidents or injury.
- Regularly inspect for any wear, such as loose screws or weak joints, and tighten or repair as necessary.
- There may be debris and/or sawdust in the pre-drilled holes. Remove this before commencing with assembly. Use gloves to remove it.
- Be cautious when handling items on glass shelves. Do not overload the shelves beyond their stated capacity, as this could lead to cracking or shattering.
- Always ensure the unit is properly plugged into a suitable power outlet with the correct voltage as indicated in the specifications.
- Do not allow the LED light strip to come into contact with water or moisture to avoid electrical hazards.
- Regularly inspect the LED strip and power cables for wear or damage. If any damage is noticed, immediately disconnect the power supply and seek professional assistance for repairs.
- Never attempt to modify or alter the electrical components or wiring of the LED light system.
- Ensure the power supply is switched off before performing any maintenance, cleaning, or adjusting of the LED lights.

- We recommend turning off the LED lights at the close of each business day to ensure energy efficiency and prolong the lifespan of the lights.
- Ensure proper ventilation around the LED lights to avoid overheating, especially if the unit is in constant use.
- Avoid covering or obstructing the LED lights to prevent overheating, which could shorten their lifespan or cause damage.
- Do not install the unit near any heat sources, such as radiators, as excessive heat can affect the longevity of the LED strip.
- Keep power cables and exposed lighting out of reach of children and animals to avoid accidental damage or injury.
