

Q-Rax Heavy Duty Racking System

Try **Monster** - Buy **Monster** - Be **Monster**

Specification

Product Description

The Q-Rax Heavy Duty Racking System is a perfect storage solution suited towards any man-cave including; garages, warehouses, stock rooms and workshops.

The racking frame is made from heavy duty steel and can hold a massive 265 KG per shelf! Finished with layers of powder coated paint, this durable racking bay will maintain its excellent condition for even longer.

The Q-Rax Heavy Duty Racking System is 100% bolt-less, making it easy to assemble and only requiring the use of a rubber mallet.

Each Q-Rax Heavy Duty Racking System can even be halved to create two work benches or smaller shelves – a quick and easy adaptation to suit your needs.

Item Contents

A single Q-Rax package includes:

8	L-Shaped Upright Beams
10	Short Beams
10	Long Beams
5	MDF Boards
4	Moulded Feet/End Caps

Specification

Product Specifics

90cm Q-Rax

Dimensions:	90cm W x 50cm D x 180cm H
Shelf Capacity:	265 KG
Materials:	Powder Coated Steel
Weight:	23.5 KG

120cm Q-Rax

Dimensions:	120cm W x 50cm D x 180cm H
Shelf Capacity:	265 KG
Materials:	Powder Coated Steel
Weight:	33 KG

Monster Guarantee

If you wish to return a product in perfect working order, we provide a 14 day returns policy as long as the item is unopened and in a resalable condition. A 12 month warranty applies to all of our electrical products; we will cover labour, parts and delivery charges. Our policy is to try and fix the item before arranging an exchange or refund. If for any reason a part is missing please get in touch with us within 7 days on receipt of your order. You can call or email our friendly and helpful Customer Support Team. For full terms and conditions contact our Support Department via the details on the Contact Us page.

Specification

Product Features

- 1) L-shaped Upright Beam
- 2) Short Beam
- 3) Long Beam
- 4) Moulded Feet
- 5) MDF Board

User Guide

Assembly Instructions

1) Group parts together and lay them on the floor.

2) Attach 4 moulded feet to the end of 4 L-shaped upright beams.

3) Take two of the L-shaped upright beams and attach a short beam across the bottom to connect the two, creating a U-shape. Push the beams into the bar locking system – remember to have them the right way up, and then hammer into place. Repeat this process on the other two upright beams.

User Guide

Assembly Instructions

4) Connect the two U-shapes together using 2 long beams. Make sure the beams that form each shelf are all level; otherwise your shelf will not be straight.

5) Slot one MDF board into this metal shelf, securing with a tap of the mallet. Your base and first shelf is complete.

Please Note: Please treat the MDF boards with varnish or mould prevention products to prolong the life of the product.

User Guide

Assembly Instructions

6) Repeat this process either side of the rack, first with two small beams for the sides then with two long beams for the front and back. The shelves can be added at a personally desired height. It is recommended to evenly distribute the shelf height to gain the maximum strength. Finally, slot another MDF board onto the second shelf.

User Guide

Assembly Instructions

7) When at the top of the first set of uprights, connect the further 4 L-shape upright beams using the short and long beams. The supports should slot and lock into one key hole on both uprights. This can be a little tricky – do not slot and lock into one key hole and then the other – both need to be done simultaneously.

8) Then continue to build the rest of the shelves, attaching the short beams at the side first, then the long beams at the front and back. Slot in each of the remaining MDF boards as you go.

User Guide

Assembly Instructions

9) For the last shelf we recommend slotting and locking it at the top key hole. This will add to the racking strength and rigidity.

10) Your Q-Rax Heavy Duty Racking System should now be complete.

Troubleshooting

Resolution Guide

Please read through the guide below if you have any issues or faults with your Q-Rax Heavy Duty Racking System.

Q: There are parts missing from my order.

A: If a part is missing please get in touch with us within 7 days on receipt of your order. You can call or email our friendly and helpful Customer Support Team. Please see details on the Contact Us page.

Q: The MDF has begun to warp or change shape.

A: Do not use this Q-Rax Heavy Duty Racking System for storage in a humid environment as the included MDF is untreated and is therefore susceptible to bend in an extremely damp or warm room. Other MDF can be cut and used by the customer.

If you would like to reduce the potential of warping, please feel free to personally treat the MDF with a varnish or paint.

Q: What kind of tools should I use to assemble the Q-Rax Heavy Duty Racking System?

A: The only tools required to assemble a Q-Rax Heavy Duty Racking System bay is a rubber mallet- available to buy at Monster Shop.

Q: I'm worried the MDF shelves might grow mould in my garage.

A: We recommend you treat the MDF with mould prevention products. They are very accessible and cheap from good DIY stores.

Safety Advice

Safe Working Practice

Please read through the safe working practice to ensure prevention of injury or damage to the device.

Do not use the Q-Rax Heavy Duty Racking System in areas of high temperature or humidity as the MDF boards are untreated and may warp or become uneven.

Do not use corrosive cleaning equipment when cleaning your Q-Rax Heavy Duty Racking System, as this may erode the paint.

Do not exceed the shelving capacities, detailed on the Specification page.
Please Note: These capacities are based on the weight distributed across the whole shelf.

Always keep the weight evenly distributed to avoid damage to the rack or MDF and to prevent the rack from falling over.

Be careful when using a hammer to assemble the Q-Rax Heavy Duty Racking System.

Ensure that each beam is properly hammered into place before continuing with the assembly process.

Be sure that each MDF board is slotted into the shelf correctly before you begin storage on the racking.

Ensure the moulded feet are attached correctly to prevent any potential injury.

Treat the MDF boards with varnish or mould prevention products if using in a humid environment.
