If you wish to return a product in perfect working order, we provide a 30 day returns policy as long as the item is unopened and in a resalable condition.

If for any reason a part is missing please get in touch with us within 7 days on receipt of your order. You can contact our friendly and helpful Customer Support Team via email or call. For full terms and conditions contact our Support Department via the details on the Contact Us page.

# User Guide

## Assembly Instructions

1. Secure the 2 Middle Grill Supports to one of your Middle Grill fixing panels using 2x cam and bolt fixings and wooden dowels. Ensure the grooved edge of panels are facing inwards.
2. Slide the middle grill into place between the middle grill supports and secure in place by joining the remaining middle grill fixing panel to the bottom using 2x cam and bolt fixings and dowels.
3. Secure two of the side grill fixing panels to one of the side supports using 4x cam and bolt fixings and 2x dowels. Repeat with the other side support.
4. Add the side panels to the side supports using 3x cam and bolts for each side.
5. Secure the side supports to the main grill panel using 8x fixing bolts for each side. The holes used on the main grill panel for the bolts will depend on the size of the radiator you wish to cover. We recommend measuring your radiator first and then choosing the appropriate holes for the size of cover you need.
6. Place the side grill on top of the side support and fixing panels, so that the end of the grill is flush against the end of the fixing panels and there are no gaps visible from the front. Secure these in place using as many of the nails as you see fit, minimum amount to use on each side should be 7.
7. Secure the top panels to the large top panel using 4x fixing bolts for each panel. The holes use for the bolts on your large top panel should directly correspond with those used on the main grill to ensure the top is the same size as the front.

# User Guide

## Assembly Instructions

8. Secure the top pieces to the main body using 4x cam and bolt fixings and 2x dowels.
9. Fixing your middle supports in the middle of the body of your cover and screw into place using the small screws provided. This will ensure your cover does not bend when items are placed on it.
10. Place your wall fixing against the wall you wish to attach your cover to and make small pencil marks to indicate where you wish to drill your pilot holes for your fixings. These should directly correspond with where you will be placing the wall fixings later and their location will depend on the size of your radiator cover.
11. Drill 4 small holes in the marked area and insert your wall plugs.
12. Secure your wall fixing in place using the large screws.
13. Slot your radiator cover on top of the fixings. The small grooves on the under side of your top panels should directly correspond with the fixings to prevent movement.

# Troubleshooting

## Resolution Guide

Please read through the guide below if you have any issues or faults with your device. The information covers and resolves the majority of frequently asked questions.

**Q: There are parts missing from my order.**

A: If there appears to be any part missing from your package contact our Customer Support team via the details on the Contact Us page within 7 days of receipt.

**Q: What type of tools do I need to build my radiator cover?**

A: You will require a screwdriver and drill for assembly. The drill will only be required to drill small pilot holes in your wall to secure the wall fixings. A small mallet may also be required to knock the parts with dowels into place, though this is dependent upon personal preference.

**Q: The cam locks and bolts will not fit into the holes correctly.**

A: There may be some sawdust/debris in the holes. This will need to be removed before building recommences. Use gloves to remove any debris, just in case wood splinters are present.

For all other issues please contact our Customer Support department via the details on the Contact page.

# Safety Advice

## Safe Working Practice

Please read through the safe working practice to ensure prevention of injury or damage to the device.

Ensure the radiator cover is only used indoors.

There may be debris and/or sawdust in the pre-drilled holes. Remove this before commencing with assembly. Use gloves to remove it.

Make sure each component is properly and securely locked before continuing with the assembly process.

Use appropriate cleaning products to clean the radiator cover.

Use eye protection when using tools such as the drill.

Ensure loose clothing and hair is tucked away when using a drill.

Do not assemble the Radiator Cover if it is damaged and/or broken.
