**Sofa Width (inc. arms)** - 202cm

**Sofa Width (exc. arms)** - 192cm

**Table height** - 45cm

**Table top** - 111.5 x 59cm

## Safety Advice

- Please read through the Safe Working Practice to ensure prevention of injury or damage to the product.
- Ensure all parts are carefully unpacked, inspected for any visible damage, and laid out before assembly. Do not proceed with assembly if any parts appear damaged; contact the supplier for replacements.
- Assemble the sofa set strictly following the provided assembly instructions. Improper assembly may compromise stability and pose a tipping hazard.
- Ensure the sofa set is positioned on a flat, stable surface. Uneven surfaces increase the risk of tipping, which may result in injury.
- Place the sofa set in a low-traffic area to prevent accidental impact or collision, especially in spaces where children or pets are present.
- Regularly inspect all joints, screws, and connectors to ensure they remain tight and secure. Loose components can lead to instability and tipping.
- Avoid placing heavy or uneven loads on any part of the sofa set or table. This may cause the furniture to become unbalanced and increase the risk of tipping.
- Do not allow children to climb or play on the furniture, as this may lead to tipping or collapse, potentially causing injury.
- Weight limits: Adhere strictly to any specified weight limits in the product manual. Exceeding these limits could compromise structural integrity and increase risk of tipping or collapse.
- Avoid exposure to extreme temperatures or prolonged direct sunlight, which may cause the aluminium frame to warp, affecting stability.
- Clean the furniture using non-abrasive, mild cleaning solutions suitable for aluminium. Do not use harsh chemicals, as these can corrode the material and weaken structural integrity over time.
- During extreme weather conditions, including high winds, store the sofa set indoors or secure it to prevent movement. Outdoor aluminium furniture can be susceptible to being blown over, increasing the risk of injury or damage.

- Conduct a visual inspection every 3–6 months, checking for any signs of wear, loosening parts, or structural weakness. Address any issues immediately to maintain safety.
- When moving the sofa set, lift each piece to avoid dragging, which may weaken joints or damage the frame.
- The table and sofa set are intended for domestic use only. Do not use for commercial or public purposes, as it may not meet required safety standards for such environments.
- Do not modify or alter the sofa set, as unauthorised modifications can compromise stability and void the warranty.
