

Clothes Airer

MonsterShop

Try **Monster** - Buy **Monster** - Be **Monster**

Specification

Product Description

Thank you for purchasing this Monster Shop Clothes Airer.

The classic design of this Clothes Airer gives your home a perfect, Victorian vibe. Easy to install, it maximises space by draping clothes from above and saves electricity and money in the process.

It's a unique alternative to using radiators or a tumble-dryer, and works better than free-standing airers too! Made from cast iron and ethically sourced, varnished wood, this Monster Shop Clothes Airer finds the perfect balance between traditional, eye-catching design and efficient, long-lasting results. See how much you can save!

You should be aware of the maximum weight load capacity of your clothes airer. This is approximately 30 KG. Under no circumstance should you exceed this weight.

We at Monster Group UK understand that it is a new and exciting purchase, and although it is tempting to get stuck in, please read the instructions before you commence assembly.

Please refer to and read Safety Advice, Safe Working Practice to ensure prevention of injury or damage to the product before starting.

Item Contents

6 x Wooden Laths	2 x Cast Iron Rack Ends
1 x Double Pulley	1 x Single Pulley
1 x 10M Cotton Rope	1 x Cleat Hook
2 x Rawlplugs	2 x Wall Screws

Specification

Product Specifics

Dimensions: (L x W)

- 1.2M Clothes Aired: 120cm x 56cm
- 1.4M Clothes Aired: 140cm x 56cm
- 1.5M Clothes Aired: 150cm x 56cm
- 1.8M Clothes Aired: 180cm x 56cm
- 2M Clothes Aired: 200cm x 56cm
- 2.4M Clothes Aired: 240cm x 56cm

Weight:

- 1.2M Clothes Aired: 3.7KG
- 1.4M Clothes Aired: 4KG
- 1.5M Clothes Aired: 4.1KG
- 1.8M Clothes Aired: 4.5KG
- 2M Clothes Aired: 4.8KG
- 2.4M Clothes Aired: 5.3KG

Material: Pine (laths), Cast Iron (pulleys, racks, cleat hook, screws), Cotton (rope).

Monster Guarantee

If you wish to return a product in perfect working order, we provide a 30 day returns policy as long as the item is unopened and in a resalable condition.

A 12 month warranty applies to all of our electrical products; we will cover the cost of labour and parts. Our policy is to try and repair the item before arranging an exchange or refund.

If for any reason a part is missing please get in touch with us within 7 days on receipt of your order. You can contact our friendly and helpful Customer Support Team via email or call. For full terms and conditions contact our Support Department via the details on the Contact Us page.

Monster Group UK Limited's liability will be limited to the commercial value of the product only.

Safety Advice

Safe Working Practice

Please read through the safe working practice outlined here to ensure prevention of injury or damage to this product.

Ensure you have read and fully understood the instructions set out in this manual before attempting to install the pulley system.

When drilling the pilot holes, it is recommended another person accompanies you to ensure the pilot holes are straight.

Never drill above or below an electrical socket. If you are unsure about electrical wiring or plumbing, use a detector to ensure it is safe before drilling into the wall or ceiling.

Do not apply excessive leverage. If the turning /rotating action of the pulleys becomes stiff or difficult to move, remove the pulley and drill a wider/deeper pilot hole.

Ensure the rope can run through the runners of the pulleys unobstructed and without rubbing against the pulley blocks. This can lead to fraying and a weakening of the rope.

User Guide

Assembly Instructions

Before you begin, you need to plan an effective location for your Clothes Airer. It must be placed close to an adjacent wall so that the Cleat Hook can be placed here.

1) The Clothes Airer is fitted from the ceiling. First, find a wooden beam or joist within your ceiling by tapping the ceiling with the handle of a screw-driver. **A hollow sound is heard where there is no joist/beam. A solid sound signals a beam or joist.** Listen for a solid sound and mark with a pencil.

2) Measure from this first point to find the second fixing point. Use the approximate guide below, and ensure to mark only where there is a beam or joist behind the ceiling.

1.2m Clothes Airer: 100cm apart

1.4m Clothes Airer: 118cm apart

1.5m Clothes Airer: 126cm apart

1.8m Clothes Airer: 150cm apart

2.0m Clothes Airer: 166cm apart

2.4m Clothes Airer: 200cm apart

3) Use a 4mm drill bit to drill 2 x pilot holes into the ceiling at the marked fixing points.

4) Screw the pulleys into the pre-drilled holes in the ceiling. Use washing-up liquid or oil on the thread to help fit the pulleys if necessary.

5) Now place the Cleat Hook to a nearby wall and mark with a pencil.

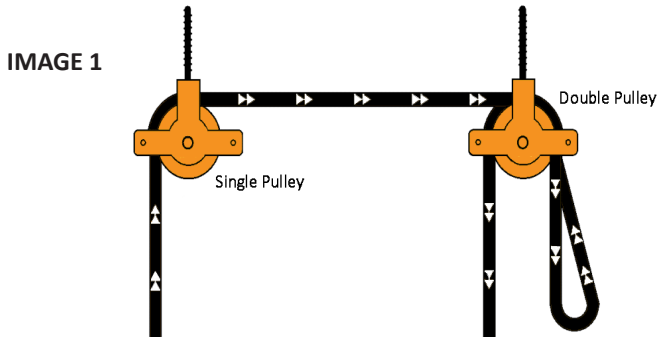

NOTE: Attach the Cleat Hook to a wall closest to the Double Pulley, NOT the Single Pulley.

User Guide

Assembly Instructions

6) Fit 2 x Rawlplugs and drill 2 x Screws into place to attach the Cleat Hook.

7) Thread the rope as in Image 1.

8) Thread the rope ends through the Cast Iron Rack End eyes and tighten firmly, as in Image 2. Cut the remains of the rope ends.

IMAGE 2

User Guide

Assembly Instructions

9) Pull the loop so that the Rack Ends are raised towards the ceiling. In this position, tie a knot in the loop.

10) Let down the Rack Ends to a position in which you could load clothes. Tie another knot in the loop here.

11) Finally, place the laths through the Cast Iron Rack Ends. You can use the Cleat Hook to hold your desired position for the Airing.

12) Your Clothes Airing is now ready to use.

NOTE: The Clothes Airing is built to withstand up to 30KG of clothes. Do not overload. For best results, operate well below this weight threshold so that the airing can be safely and easily pulled toward the ceiling.

Maintenance

Generally speaking, your Clothes Airing should not face any problems after assembly. However, we recommend to check the following often;

- Check that the pulleys are still firm into the ceiling and haven't twisted or turned.
- Check there is no fraying to the rope and all knots are tight.
- Check the Cleat Hook is firm and flush against the wall and the screws are secure to the wall.

Troubleshooting

Resolution Guide

Please read through the guide below if you have any issues or faults with your device. The information covers and resolves the majority of frequently asked questions.

What do I do if...

Q: ... there are parts missing from my order?

A: If there are parts missing from your order, please contact our friendly and helpful Customer Support Team. These contact details can be found in the **Contact Us** section of this manual.

Q: ... the pulleys/cleat hook are not fixing into the ceiling/wall firm enough?

A: Ensure you have pre-drilled deep enough into the wall, and ensure that you have used the rawlplugs provided. If the problem persists, check that there is a wooden beam/joist where you are drilling. If there is no beam/joist, the rawlplug and screw will have no leverage to attach to. Detach and reposition if necessary.

Q: ... my wooden laths do not reach across the cast iron racks?

A: Did you use the guide, measure the distance and mark with a pencil first? If not, re-read the assembly instructions and follow the marking guide.

For all other issues please contact our Customer Support department via the details on the **Contact** page.
