SOUND DEADENING MATS

Try **Monster** - Buy **Monster** - Be **Monster**

Specification

Product Description

Thank you for purchasing this highly effective sound deadening matting for cars and vans. Sound deadening mats have three uses; to stop outside sounds from coming in, stop inside sounds from escaping and reduce rattle and vibration both inside and out.

After you have installed this sound absorption system you will realise just how much you needed it. Every car journey will be quieter, more comfortable and it will sound like you just picked up a brand new shiny car.

Our sound deadening mats come in five sizes of pack:

22 sheet pack

32 sheet pack

Bulk sized roll

Kit inc. 22 sheet pack x 2

Kit inc. 22 sheet pack x 2 and 1 x bulk sized roll

This pack of 2.5 mm thick mats will insulate your vehicle from intrusive road noise, niggling rattles and annoying vibrations. It deadens all different types of noises and movement so can be used anywhere in your vehicle.

The sheets are flexible, super sticky once peeled away from the backing and easy to cut which means they are simple to install anywhere including under the bonnet. The embossed design on the silver layer acts as a template so when cutting with scissors to size or with a Stanley knife once stuck you'll get a neat, straight edge.

It's awesome value too. Our matting is 0.5mm thicker than our competitors and our pack sizes are bigger both of which give you extra proofing power.

Specification

Product Description

We at Monster Group UK understand this is a new and exciting purchase, and although it is tempting to get stuck in please carefully read these instructions before you start using the product.

Please refer to and read Safety Advice, Safe Working Practice to ensure prevention of injury or damage to the device before starting.

Specification

Product Specifics

Material: 2.5 mm thick, fire retardant, silver embossed aluminium top, black butyl base and paper backing.

22 Sheet Pack:

Dimensions: D 2.5mm W 375mm L 270mm

Weight: 4.5kg

32 Sheet Pack:

Dimensions: D 2.5mm W 187mm L 265mm

Weight: 5.8kg

Bulk roll:

Dimensions: D 2.5mm W 750mm L 4700mm

Weight: 13kg

Kit inc. 2 x 22 sheet packs

Dimensions: D 2.5mm W 375mm L 270mm

Weight: 9kg

Kit inc. 1 x bulk roll and 2 x 22 sheet packs

Dimensions: W 750mm L 4700mm 13kg

D: 2.5mm W 375mm L 270mm 9kg

Monster Guarantee

If you wish to return a product in perfect working order, we provide a 30 day returns policy as long as the item is unopened and in a resalable condition.

A 12 month warranty applies to all of our electrical products; we will cover the cost of labour and parts. Our policy is to try and repair the item before arranging an exchange or refund.

If for any reason a part is missing please get in touch with us within 7 days on receipt of your order. You can contact our friendly and helpful Customer Support Team via email or call. For full terms and conditions contact our Support Department via the details on the Contact Us page.

Monster Group UK Limited's liability will be limited to the commercial value of the product only.

Safety Advice

Safe Working Practice

Please read through the safe working practice to ensure prevention of injury or damage to yourself, others, the vehicle and the product.

Ensure the instruction manual and its safety advice has been read in full before installing this product.

Use the product within one year of purchase.

Wear old clothes or overalls. The installation of this product requires thorough cleaning of the areas of the vehicle it is being installed in. The adhesive on the back of the matting is also very sticky.

Do not stick to anywhere other than where the product is intended for use.

Do not stick to the skin. The adhesive is strong and may cause irritation.

Do be ready to put in place as soon as the backing is removed.

Do not use this product for anything other than its intended purpose.

Do not try to alter or modify this product.

When cutting the sheets to size with either scissors or a Stanley knife please **use caution and safety gloves** so as not to cause injury to yourself or the vehicle.

IMPORTANT!

Be aware that the matting should never cover important safety features within the car such as seatbelt anchors. Follow instructions carefully and ensure these areas are not compromised. Neither should it cover any part of the vehicle that will be used for future maintenance. Follow instructions, read the vehicle manual carefully and ensure these areas are not compromised

Specification

Product Features

Top layer: Silver embossed aluminium.

Middle layer: Super sticky black butyl rubber.

Bottom layer: Peel away backing paper.

The matting comes in either sheets or rolls. Both have an easy to cut surface with an embossed pattern to act as a guide for cutting.

Fire Retardant Material

User Guide

Operation Instructions

Please follow these instructions for installation. Our sound deadening matting is a fantastic multi-tasking product that can be fitted to any part of the vehicle which is creating an annoying clank instead of a smooth hum or a judder where there should only be a steady stillness.

Tools needed for all areas of the vehicle

Make sure you work on the vehicle and product with professional, good quality tools.

- The vehicle manual for instructions on how to remove and re-install the relevant parts and the tools needed to do so.
- A solvent based cleaning product.
- A sharp pair of scissors.
- A Stanley knife or similar.
- A safe area and/or board to rest on while cutting.
- Masking tape.
- A roll of aluminium foil tape to seal and protect the edges of the matting.
- Cardboard, strong paper or old sheets with which to make a template.
- A small (approx 2 inches) hard surfaced roller with a handle.
- A small hard surfaced ball such as a squash or tennis ball.

1. Following the instructions in your vehicle's manual, carefully remove the relevant parts of the vehicle needed (for example the door panel and interior trim.) Make sure to pay strict attention to what parts have been removed and where you place them. Hunting around for a vital piece later on will only be annoying.

2. Thoroughly clean and dry the area of the vehicle that you are proofing with a solvent based product. You want the matting to stick to the vehicle's surface not to any dirt, dust or sand that might be lurking. It will also be much easier to get a tight seal between the car body and the matting ensuring the highest level of sound absorption possible.

User Guide

Operation Instructions

3. Make a template. Take approximate measurements of the relevant area and find a piece of pliable material or card large enough. Cut it to the rough shape needed but a slightly larger size.

4. Place your template over the area to be proofed and temporarily secure with masking tape or clips.

5. Assess and mark in pencil the location of any holes that may be needed in the mats. Do not make any more or larger holes than are needed as this will compromise the sound deadening effect.

6. Adjust the size of your template now it is in place and the size and shape of the area is clearer. Trim or add extra pieces with tape.

7. If there are any changes of shape or depressions in the vehicle (the curve of a roof for example) ensure your mat will flow smoothly over here by adding perforation or cut lines of 20mm so flexibility and overlap is possible when fitting.

8. Try and loosely place on top of the template any car components that will need to fit over the sound proofing. Make adjustments if necessary.

9. On a flat surface suitable for cutting place the sound proofing sheets over the template and trim to size where needed using a sharp knife or scissors. Loosely stick sheets together with masking tape where needed. The scored backing will make this a much easier job. Carefully make the holes and cut lines marked on the template.

10. With the template close by for guidance peel off the backing of your cut-to-size sound proofing sheets and carefully smooth into place paying close attention to the form of the vehicle.

11. Use a small, hard surfaced roller to press the matting as close as possible to the car body. In places where the surface of the vehicle is curved use a small ball such as a squash or tennis ball.

User Guide

Operation Instructions

12. Carefully trim the matting where needed.
13. Use aluminium foil tape on the edges of the matting to create a stronger seal and a smooth, neat edge.
13. Ensure no wiring, safety features and areas where maintenance and repair may be needed have been covered up.
14. Replace the components of the car removed carefully following the instructions in your vehicle's manual.

Trouble Shooting

Resolution Guide

Please read through the guide below if you have any issues or faults with your Monster Matting Sound Deadening Mats.

Q: There are parts missing from my order.

A: If there appears to be anything missing from your package please contact our Customer Support Team via the details on the Contact Us page.
