

CAPACITY

10Ton

WARNING

1. Carefully read and follow all safety practices and warnings outlined in the owner's manual.
2. Ensure that the safety chains are properly attached and not excessively slack. Failure to do so may result in the ramp moving or falling from the dock or truck surface.
3. Only individuals who have received appropriate training should use the ramp.
4. Avoid stopping, starting, or changing speeds of the truck while on the ramp.
5. Never place any body part, such as hands, head, or feet, between the ground and the ramp.
6. Always store the ramp in the lowered position when not in use.
7. Never allow a carrier to drive away while the ramp is still in use, as this may cause it to fall to the ground.
8. Avoid walking or driving on the ramp unless it is resting on a stable support at the lip end.
9. Ensure that the release valve is left in the open position when using the Mobile Container Ramp.

Failure to follow these and all provided operating and safety instructions according to the manual could result in serious injury or death.

WARNING

Secure both safety chains by looping them around the carrier frame and locking them with a grab hook. Ensure that the chains have minimal slack to prevent the ramp from shifting or moving away from the carrier.

Failure to follow these instructions could result in serious injury or death.

WARNING

Do not place hands, head, feet or any part of person between the ground and the ramp or towbar.

Failure to follow these instructions could result in serious injury or death.
