

**TB60**

**Till Block**

**Try Monster - Buy Monster - Be Monster**

# Specification

## Product Description

Put your cash register on a pedestal- sort of- with this superb TB60 till block. Not only does this till block have an ergonomically designed, recessed top shelf to house your till and card machine, but there's also plenty of space in the large storage area to house anything else you need immediate access to while you're serving customers. Secretly store things like plastic bags, till rolls and gift wrap away from public view, or even tuck a bin in there so you can keep your shop looking neat and tidy.

The sturdy design of the till block can easily take the weight of even the most cumbersome payment system, and the maple laminate finish will go equally well with your decor and your uniforms, making anyone whose turn it is to command the till look an extra 25% smarter and more professional just by being stood behind it.

## Product Specifics

Dimensions: 600mm (W) x 600mm (D) x 900mm (H)

## Product Features

- 1) Till Shelf
- 2) Side Panel
- 3) Bottom Shelf

# User Guide

## Assembly Instructions

Please follow these simple instructions to assemble the retail counter.

### Step 1:

Identify yourself with all the parts using the images below. Work in an appropriate area, with plenty of room.

# User Guide

## Assembly Instructions

### Step 2:

First place all the cam locks into the 4 holes in the bottom panels (B). There are 2 on each panel.

Cabinet Part WITHOUT  
Cam Lock

Cabinet Part WITH  
Cam Lock

### Step 3:

Screw all the cam lock pegs into the appropriate holes, located on the side panels C.

### Step 4:

Using the bolts and cross dowel nuts, attach parts A and E the side panel C. Turn the parts on the side, so C becomes the base. Using the same process, attach the back panel D.

### Step 5:

Push on the base panels B onto the bottom of C and attach by turning the cam locks.

### Step 6:

Attach the second side panel C using the remaining bolts and cross dowel nuts. This part can be a little tricky when lining up all the parts with the bolts.

### Step 7:

Turn the counter the correct way up. Your counter should now be complete.

# Troubleshooting

## Resolution Guide

Please read through the guide below if you have any issues or faults with your counter. The information covers and resolves the majority of frequently asked questions.

**Q: The bolts are not screwing through the side panel into the shelf.**

**A:** If resistance is experienced when inserting the bolt into the cross dowel nut, try using a screwdriver to rotate the nut 180 degrees.

**Q: Nuts/bolts will not fit into the holes correctly.**

**A:** There may be some saw dust debris in the holes, which require removing before building commences.

**Q: There are pieces missing from my retail counter.**

**A:** Lay all parts out on the floor to double check the parts from the Item Contents page and be sure to look inside the counters original packaging. If the pieces can't be found you can contact our Customer Support department via the details on the Contact page.

**Q: Is my counter fire resistant?**

**A:** The counter is not fire resistant.

**Q: Can I paint my counter?**

**A:** We do not recommend you paint your counter.

# Safety Advice

## Safe Working Practice

Please read through the safe working practice to ensure prevention of injury or damage to the counter.

Do not store the counter in areas of high temperature or humidity.

There may be some sawdust in the holes, remove before building.

Prolong the life of the counter by keeping clean.

Use appropriate cleaning products to clean the wood and glass.
