# Workbench

## Improvements

There are 2 parts of the Workbench we want improving- the shelf and draw.

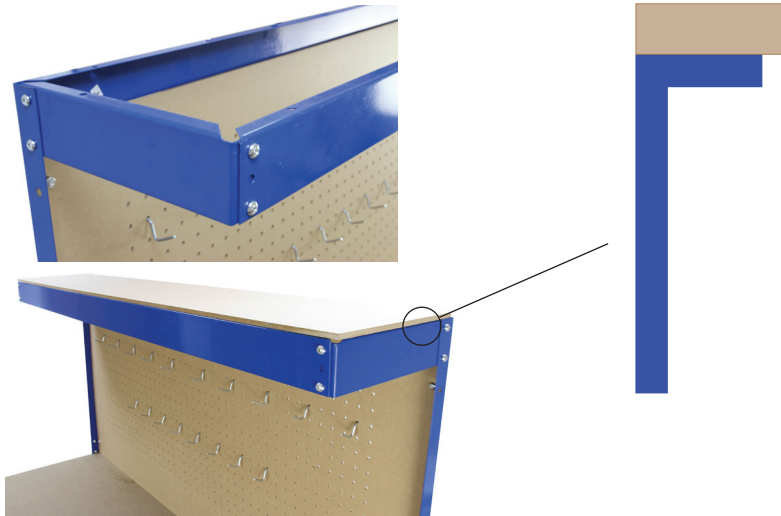

# Workbench

## Shelf

For the shelf- we want the shelf to have 2 reversable options. We want ours to be able to go 2 ways - up and upside down. We think the best way to do this is to create a welded inner-lip. See 'Our Shelf' shelf side views. If you do not think this will be very strong or have a better suggestion, please let us know.

## Draw

The draw on the sample is not very strong. We want our draw to have a central bar, that attaches with nut and bolts. We want the nut and bolt to go through the wood.
